DATE MAILED: 10/12/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/612,475	Applicant(s) DECLER ET AL.	
	Examiner Aaron M. Dunwoody	Art Unit 3679	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 July 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 and 17-19 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-8, 17-19 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by US patent 5890517, Laible.

In regards to claim 1, in Figures 4 and 5, Laible discloses a coupler device for fluid transport, comprising:

a body including an outer surface being a circumferential outer sidewall, the outer sidewall having a first end and a second end with an opening extending through the first and second ends, the body defining a slot disposed proximate one of the first end or second end, the slot extending in a direction transverse to the opening and through the outer sidewall;

a latch assembly including at least one outer member being disposed on the body externally exposed of the outer surface and connected with an inner member being disposed through the slot, the outer member protruding from the outer surface and reciprocates with respect to the outer sidewall, the inner member reciprocating within the slot and having an aperture corresponding with the opening, whereby the body is releasably connectable with a piece of fluid transport equipment through the inner member; and

an overmold portion formed about the outer sidewall of the body, the overmold portion defining a material molded over the body as an addition layer, such that the overmold portion is formed substantially about the outer sidewall, the overmold portion including a shroud portion partially covering the outer member of the latch assembly, the shroud portion being a wall extending outward from the outer sidewall and adjacent and around the outer member of the latch assembly, the wall extending in a direction transverse to the outer surface, and a top portion of the wall protruding from the outer surface at least a same distance as an outermost portion of the outer member protrudes from the outer surface when the outer member is in a non-depressed state.

In regards claim 2, Laible discloses the body including a connection means disposed at one of the first or second ends opposite the slot, whereby the connection means being connectable to a fluid transport system.

In regards claim 3, Laible discloses the connection means being a groove residing between the outer sidewall and the opening, the groove being a socket fitting.

In regards claim 4, Laible discloses a part of the outer surface of the body having a recessed face disposed about the slot and extending in a direction along the outer surface toward the first and second ends.

In regards claim 5, Laible discloses the recessed face being substantially planar, the recessed face being engageable with a portion of the outer member, the portion reciprocates with respect to the recessed face and over the slot.

In regards claim 6, Laible discloses the opening of the body substantially being radially symmetrical.

In regards claim 7, Laible discloses the body is constructed of a molded material, the molded material being more rigid than the overmold portion.

In regards claim 8, Laible discloses the outer member of the latch assembly including an actuating member, a biasing member and a retaining member, the actuating member and the retaining member being connected at oppositely disposed ends of the inner member and outside the slot, and the biasing member being between the actuating member and the inner member, the biasing member being disposed on the outer surface over the slot and enabling the actuating member and retaining member to reciprocate with respect to the outer surface.

In regards claim 17, Laible discloses the rigid plastic material is polypropylene.

In regards claim 18, Laible discloses the overmold portion is an injection molded low tolerance material.

In regards claim 19, Laible discloses the low tolerance plastic material is a soft thermoplastic rubber material.

Response to Arguments

Applicant's arguments with respect to claims above have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3679

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aaron M. Dunwoody whose telephone number is 571-272-7080. The examiner can normally be reached on 7:30 am - 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel P. Stodola can be reached on 571-272-7087. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
